#### **Reporting Hospitals**

- Boston Medical Center

---

#### **Boston Medical Center**

In addition to pancreas resections, Boston Medical Center surgeons perform other complex pancreas operations for both benign and malignant conditions. These operations include biliary (and gastric) bypasses for unresectable pancreas cancers, internal drainages of pancreatic pseudocysts, decompressions of the pancreatic duct for intractable pain due to chronic pancreatitis, necrosectomies for severe acute pancreatitis, and staging laparoscopies for tumors.
